I am filing a written response to  
oppose the objection in my case Claim no 4333.  
Since my accident I have been more  
than cooperative. I have sent medical  
papers and any other information  
that was asked for. The accident changed  
my life. I have been in constant pain.  
I have to have injections in my back  
knees, hips and the tops of my feet.

Every 3 to 4 months, I will have to keep getting these injections for the rest of my life. I am in physical therapy off and on also for the rest of my life. The amount I am asking for is not near enough for all the pain I have been through. I will settle for what I asked for and let it be. My doctor wants me to have back surgery. It seems to think it would relieve the pain on the nerve damage. I was scheduled to have the back surgery in March but did not have the finances. So yes my settlement would very much help me. Please reconsider and don't throw my case out. Please award me what I asked for because I really do need it.

Thank you
